The purpose of the Director's Interpretation Application is to provide a process to clarify terms or phrases within this title which may require further interpretation. The application also provides a means to assign new or non-categorized uses to permitted, accessory, or conditional uses in a zone. Interpretations of code terms, intent, or meaning are different from other land use applications in that they are an interpretation of language and policy, as opposed to an evaluation of a use or development. The application may be submitted in advance of, or concurrent with, an application, permit, or other action.

What is the requested interpretation? This request is for being submitted for consideration of city water use, with the intention to hook up the residence 310 NE Devils lake rd, located on 5 acres, to the city water supply line. Currently, the house is using a well for water and is outside of the urban growth boundary. The water from this well is insufficient for household consumption, with low PH levels (acidic), moderate levels of sediment and high levels of iron detected, resulting in pipe corrosion in the residence and other hardships. Access to city water would resolve these issues. The use of water at the residence presently and in the future, is only for household consumption, with no use of water for the land.

The director has the authority to consider the request for an interpretation, and shall respond within 30 days following the date of the request, as to whether or not a requested interpretation will be issued. The director may issue or decline to issue a requested interpretation. The director's decision to decline to issue an interpretation is final when the decision is mailed to the party requesting the interpretation. The decision to decline to issue an interpretation is not subject to local appeal.

I (We) hereby declare under penalty of perjury under the laws of the State of Oregon that the foregoing information is true, complete, and accurate.
